

# Philosophy for Children Alberta

## Junior Elementary Learning Outcomes

### GRADES 1 2 3

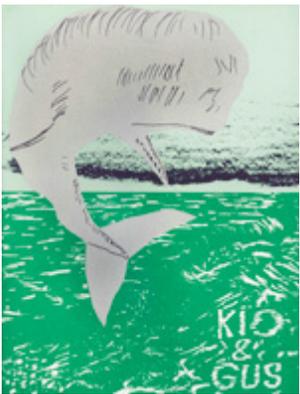

#### Overview

Grades 1, 2, and 3 help students shape attitudes towards learning and education that will stay with them for the rest of their lives. The Alberta Education curriculum requires students to develop specific critical thinking skills within each subject area and competence in generalizing beyond the specifics of the classroom. Students are also expected to share ideas constructively and collaborate to solve problems. Core benefits of incorporating the Philosophy for Children program into your classroom are critical thinking development and the formation of a community of inquiry.

**ELFIE** is in the first grade and is so shy she can't speak in class and can hardly even formulate a question. Yet little escapes her, and her mind puzzles over everything that happens in class and at home. When the principal proposes a contest aimed at improving reasoning, her whole class is caught up in figuring out how sentences work and how distinctions and connections are made. At the same time, Elfie and her classmates discover many distinctions fundamental to inquiry: appearance and reality, the one and the many, parts and wholes, similarity and difference, permanence and change. Ethical concepts in this novel include friendship, love, self-esteem, respect for others, teasing, choosing, and parent-child relationships. The type is large and readable, with some blank pages for young readers to try their hand at book illustration.

Grade Range: K-3; Target Grades: 1-2

**KIO & GUS** tells the story of Kio who visits his grandparents' farm and becomes friendly with Gus, who lives with her family not far away. Gus helps Kio become aware of the world as the blind experience it, and some of the differences that characterize the creative activities of the blind. Kio's grandfather was once a sailor, and early in the book tells of an encounter he once had with a whale. He is determined to visit a site where he can observe whales once again, and Kio persuades him to take the two families along. The main characters are children who are sensitive to language and ideas as well as to the animals, people and things in the world that surrounds them. The way they explore these ideas and sensitivities is through conversation between themselves and with others. Among the contrasting concepts that Gus and Kio wonder about are make-believe/reality, fear/courage, saying/doing, and truth/beauty. Young readers will find their sense of wonder challenged as much as their reasoning skills. The type is large and readable, with some blank pages for young readers to try their hand at book illustration.

Grade Range: 1-4; Target Grades: 2-3

**PIXIE** is an elementary school student perplexed and delighted by many aspects of her life experiences. In this novel she discovers many different kinds of relationships, as well as reasons and rules. When her schoolteacher assigns each student to choose a mystery creature and find it on the class trip to the zoo, Pixie's notions of class relationships have some startling consequences. This novel emphasizes relationships (logical, social, familial, aesthetic, causal, part-whole, mathematical, etc.) as well as competence in dealing with such relationships. Ethical concepts include sibling-rivalry, personhood, respect for others, friendship, secrets, promise-keeping, parent-child relationships, obedience, teasing, and autonomy. Readers will find the pages strewn with philosophical ideas and puzzles that lead to lively classroom deliberation. The type is large and readable, with some blank pages for young readers to try their hand at book illustration.

Grade Range: 2-5; Target Grades: 3-4
